VOLUME CONTENTS

Number 1

Moon Soo Choi and Chi-Hyuck Jun	1	Some variants of polygon-to-chain reductions in evaluating reliability of undirected network
B. K. Jones, Y. Z. Xu, T. C. Denton and P. Zobbi	13	Electrical measurements as early indicators of electromigration failure
Qiying Hu	27	The optimal replacement of a Markovian deteriorative system under stochastic shocks
H. Krishna and K. K. Sharma	33	Bayes estimates of pointwise and interval availability with Type I censored samples
K. K. Sharma and H. Krishna	37	Non-parametric distribution of the reliability function for some basic system configurations
Kazumi Yasui and Toshio Nakagawa	41	Reliability considerations of a selective-repeat ARQ policy for a data communication system
Zeinhum F. Jaheen	45	Bayesian approach to prediction with outliers from the Burr type X model
Cai Kai-Yuan, Wen Chuan-Yuan and Zhang Ming-Lian	49	Posbist reliability behavior of fault-tolerant systems
T. Leo Alexander and N. Balakrishnan	57	Efficient estimation of the mean of an exponential distribution when two outliers are present
Surendra M. Gupta	65	Stochastic analysis of systems with primary and secondary failures
Rajesh Pathak and Chanan Singh	73	A new mathematical approach to multi-area power system reliability evaluation
Sergey V. Gurov and Lev V. Utkin	81	A new method to compute reliability of repairable series systems by arbitrary distributions
E. J. Vanderperre	87	An integro-differential equation related to Gaver's parallel system
D. Pandey and Mendus Jacob	91	Cost analysis, availability and MTTF of a three state standby complex system under common cause and human failures
Shaban Abdel-Magid	97	MINQUE and PSD-MINQMBE in the two way cross classification random effect model without interaction
J. Verweij and M. Lunenborg	101	On the design of a reliability circuit simulator
		Technical Notes
H. Krishna and K. K. Sharma	105	Inferences on availability ratio
S. A. Siddiqui, Deoki Nandan, Sanjay Gupta and Manish Subharwal	109	A new increasing failure rate model for life time data
Rakesh Gupta and Alka Chaudhary	113	Analysis of reliability bounds for two-unit parallel and standby repairable systems
Sharda and Indra	117	Explicit transient and steady state queue length probabilities of a queueing model with server on vacation providing service intermittently
	131	Letter to the Editor
	137	Report by the Editor-in-Chief
	145	Publications, notices, calls for papers, etc.
	153	Calendar of international conferences, symposia, lectures and meetings of interest

Number 2

Yow-Mow Chen	159	Availability of nonindependent main unit and n-unit series subsystem subject to shut-off rules
L. V. Utkin, S. V. Gurov and I. B. Shubinsky	171	A method to solve fuzzy reliability optimization problem
T. Yanagisawa	183	Long-term degradation tests of amorphous silicon solar cells: correlation between light- and current-induced degradation characteristics
K.-H. Wang and W.-F. Hsieh	189	Optimal control of a removable and non-reliable server in a Markovian queueing system with finite capacity
Yi-Chih Hsieh and Kuo-Hsiung Wang	197	Reliability of a repairable system with spares and a removable repairman
K. I. Arshak, D. McDonagh, J. Braddell, E. Murphy and P. Gleeson	209	A case study of statistical process control on the prime process using PLASMASK 302U
Nan Hwang and L. Forbes	225	Hot-carrier induced series resistance enhancement model (HISREM) of nMOSFET's for circuit simulations and reliability projections
J. L. Roca	241	Cause–effect alarm failure analysis for nuclear reactor protection system EDM modules
M. N. Gopalan and K. S. Bhanu	251	Cost analysis of a two unit repairable system subject to on-line preventive maintenance and/or repair
D. Pandey, S. K. Tyagi and M. Jacob	259	Profit evaluation of a two-unit system with internal and external repairs, inspection and post repair
M. Sharma and G. C. Sharma	265	Some optimality conditions for $M^b/M/C$ queueing systems
M. Yamashiro	269	The median for a L–R fuzzy number
P. K. Kapur and S. Younes	273	Software reliability growth model with error dependency
J. Ferdous, Md. Borhan Uddin and M. Pandey	279	Estimation of reliability of a component under multiple stresses
J. Singh and P. Goel	285	Availability analysis of a standby complex system having imperfect switch-over device
K. K. Sharma and H. Krishna	289	Non-parametric inferences on system availability with a reference of k-out-of-m systems
		Technical Notes
M. A. Aziz	295	A set theoretic method for enumeration of pathsets of non-directed graphs
M. Gururajan and B. Srinivasan	299	A complex two-unit system with random breakdown of repair facility
V. S. Rana	303	Reliability analysis of a national broadcasting network (NBN) system
Yi-Chih Hsieh and M. S. Andersland	309	Repairable single server systems with multiple breakdown modes
	319	Publications, notices, calls for papers, etc

SPECIAL ISSUE
RELIABILITY PHYSICS OF ADVANCED ELECTRON DEVICES

N. Stojadinović	321	Editorial

REVIEW PAPERS

E. Takeda, K. Ikuzaki, H. Katto, Y. Ohji, K. Hinode, A. Hamada, T. Sakuta, T. Funabiki and T. Sasaki 325 VLSI reliability challenges: from device physics to wafer scale systems

W. H. Krautschneider 365 Reliability issues of scaled-down MOS transistors for gigabit circuits

P. Lall, M. Pecht and E. B. Hakim 377 Characterization of functional relationship between temperature and microelectronic reliability

D. M. Fleetwood, M. R. Shaneyfelt, W. L. Warren, J. R. Schwank, T. L. Meisenheimer and P. S. Winokur 403 Border traps: issues for MOS radiation response and long-term reliability

J. M. Soden and R. E. Anderson 429 IC failure analysis: techniques and tools for quality and reliability improvement

M. M. Jevtić 455 Noise as a diagnostic and prediction tool in reliability physics

RESEARCH PAPERS

P. Habaš 481 Modeling study of the experimental techniques for the characterization of MOSFET hot-carrier aging

F. Grabowski 511 Difference between the 1/f noise spectral density before and after stress as a measure of the submicron MOS transistors degradation

B. Neri, P. Olivo, R. Saletti and M. Signoretta 529 Dielectric breakdown and reliability of MOS microstructures: traditional characterization and low-frequency noise measurements

M. Nafría, J. Suñé, F. Yélamos and X. Aymerich 539 High field dynamic stress of thin SiO_2 films

K. Verhaege, G. Groeseneken, J.-P. Colinge and H. E. Maes 555 The ESD protection mechanisms and the related failure modes and mechanisms observed in SOI snapback NMOSFET's

P. Mattei, S. Graffi, Zs. M. Kovács-V and G. Masetti 567 Design of integrated BiCMOS operational amplifiers with low-probability EMI-induced-failures

N. Stojadinović, S. Golubović, S. Djorić and S. Dimitrijev 587 Analysis of gamma-irradiation induced degradation mechanisms in power VDMOSFETs

S. R. Anderson, R. D. Schrimpf, K. F. Galloway and J. L. Titus 603 Exploration of heavy ion irradiation effects on gate oxide reliability in power MOSFETs

TECHNICAL NOTES

M. I. Loupis and J. N. Avaritsiotis 611 The applicability of logarithmic extreme value distributions in electromigration induced failures of Al/Cu thin-film interconnects

M. Sanada 619 Evaluation and detection of CMOS-LSI with abnormal IDDQ

I. de Munari, F. Fantini and P. Conti 631 Thermal stability of Al/Ni gate AlGaAs/GaAs HEMT's

Number 4

E. A. Pohl and D. L. Dietrich 637 Environmental Stress Screening Strategies for complex systems: a 3-level mixed distribution model

M. Kimura, S. Yamada, H. Tanaka, T. Nagaike and S. Osaki 657 Quality assessment models for initial production process control based on stochastic differential equations

A. A. Ismaeel and R. Bhatnagar 669 Modeling for stuck faults in CMOS Non-Threshold Logic (NTL) combinational circuits

Bin Liu and Jinhua Cao 683 A machine service model with a service station consisting of r unreliable units

G. K. Agrafiotis and S. K. Singh 691 System characteristic and cost analysis of a two unit standby system with spare units

V. S. S. Yadavalli and N. Singh	699	Determination of reliability density function when the failure rate is a random variable
Z. F. Jaheen	703	Bayesian approach to prediction with outliers from the Burr type X model
Yinghui Tang	707	Some reliability problems arising in GI/G/1 queueing system with repairable service station
K. P. Roenker	713	Reliability issues for III–V heterojunction bipolar transistors
K. K. Bansal and R. L. Garg	725	An additional space special service facility heterogeneous queue
Yisong Dai, Jiesung Shi, Xinfa Zhang, Jiawel Shi and Ensun Jin	731	A study of optical noise measurement as a reliability estimation for laser diodes
Li Dong-Kui and Chi Hang-Zhong	735	Two reduced formulas for reliability evaluation of three-state device networks
L. R. Goel, P. K. Tyagi and R. Gupta	739	A cold standby system with arrival time of server and correlated failures and repairs
Wu Shao-ming	743	Function process and reliability analysis of a two-dependent-unit system
		Technical Notes
R. K. Agnihotri and S. K. Satsangi	749	Analysis of a two unit redundant system with optimum interchangement time
C. Senthil Kumar	751	Standby redundancy at system and component levels—a comparison
V. K. Tyagi	753	Profit analysis of two-unit standby system with rest period for the operator and correlated failures and repairs
	759	Book reviews
	763	Publications, notices, calls for papers, etc
	773	Calendar

Number 5

A. M. M. Shaban	777	Biased estimates of variance components
H. Schäbe	783	An improved algorithm for cutset evaluation from paths
V. S. S. Yadavalli and C. Umasankaram	789	Simulation study of a priority queueing system
R. Billinton and Guangbin Lian	797	A new technique for active minimal cut set selection used in substation reliability evaluation
M. R. Marks, Qin Wei, Wang Jiaji and Chen Yi	807	A high-quality cross-sectional transmission electron microscope specimen preparation technique for structural and interfacial property studies in microelectronic packaging
K. E. Ahmad, M. E. Fakhry and Z. F. Jaheen	817	Bayes estimation of $P(Y > X)$ in the geometric case
P. N. Andhare, R. K. Nahar and S. Chandra	821	Study of hot electron degradation in submicrometer gate length MOS transistor fabricated with selectively doped substrate engineering
L. Schwartz and D. Trstenský	827	The structural reliability of cable television
A. Kumar, S. K. Gupta and G. Taneja	829	Probabilistic analysis of a two-unit cold standby system with instructions at need
J. P. Singh Joorel and P. D. Heydari	833	Behaviour of a priority standby redundant system with different types of repair facilities

G. Shankar and V. Sahani	837	GERT analysis of a two-unit cold standby system with repair
S. V. Gurov, L. V. Utkin and I. B. Shubinsky	841	Two-sided bounds of reliability for large systems
		Technical Notes
V. Sridharan	847	A simple ordering policy with linear lifetime for a unit
M. N. Gopalan and U. D. Kumar	851	Probabilistic analysis of a n-unit cold-standby system with general failure and repair time distributions
S. A. Siddiqui and S. Mishra	859	Reliability analysis of a finite range failure model
N. R. Rajopadhye and P. Dhar	863	Salvaging solder joints accidentally exposed to nitric acid: a case study
B. Singh	865	An algorithm for evaluating all the minimal cuts of a graph
R. K. Agnihotri, S. K. Satsangi and S. C. Agrawal	869	Two non-identical operative unit system with repair and inspection

Number 6

Kodo Ito and Toshio Nakagawa	875	An optimal inspection policy for a storage system with high reliability
F. K. Wang and J. Bert Keats	883	Improved percentile estimation for the two-parameter Weibull distribution
J. S. Koh, C. H. Kim, J. I. Park and B. J. Yum	893	Determination of effective burn-in time for Printed Board Assembly
C. Constantinescu and K. Trivedi	903	Dependability modeling of real-time systems using stochastic reward nets
S. Jain	915	Problem of statistical inference for heavy traffic in M/M/1 queue
K. H. Wang and L.-Y. Hsu	923	Cost analysis of the machine-repair problem with R non-reliable service stations
K. L. Pey, W. K. Chim, L. S. Koh, Y. Y. Liu and S. Y. C. Chew	935	An application of spectroscopic emission microscopy and cathodoluminescence to the failure analysis of near-infrared light emitting diodes
S. Ghosh	947	A distributed algorithm for fault simulation of combinatorial and asynchronous sequential digital designs, utilizing circuit partitioning, on loosely-coupled parallel processors
Jinhua Cao and Yuedong Wang	969	The EBELC and EWELC classes of life distributions
Yuanlong Shen	973	A new simple algorithm for enumerating all minimal paths and cuts of a graph
Yinghui Tang	977	The bound of reliability for the system subject to shock breakdowns
M. A. El-Damcese	981	Analytical evaluation of reliability models for multiplex systems
Cai Kai-Yuan, Wen Chuan-Yuan and Zhang Ming-Lian	985	Mixture models in profust reliability theory
R. Anjard	995	Software quality assurance considerations
R. Subramanian and V. Anantharaman	1001	Probabilistic analysis of a three unit cold standby redundant system with repair
	1009	Book review
	1011	Publications, notices, calls for papers

Number 7

M. A. Manzoul and P. Modali 1017 Overcurrent relay on a FPGA chip

Kuo-Hsiung Wang and Hui-Mei Huang 1023 Optimal control of a removable server in an $M/E_k/1$ queueing system with finite capacity

Fan C. Meng 1031 Comparing the MTBF of four systems with standby components

Nianfu Yang and B. S. Dhillon 1037 Stochastic analysis of a general standby system with constant human error and arbitrary system repair rates

H. Maciejewski 1047 Accelerated Life Test data analysis with generalised life distribution function and with no aging model assumption

R. P. Anjard 1053 Profound knowledge application of a major Deming principle

M. A. El-Damcese 1059 Markovian-model for systems with independent units

M. A. W. Mahmoud, M. M. Mohie El-Din and M. El-Said Moshref 1063 Reliability analysis of a two-unit cold standby system with inspection, replacement, proviso of rest, two types of repair and preparation time

P. Habaš 1073 Modeling study of the experimental techniques for the characterization of MOSFET hot-carrier aging

1105 Publications, notices, calls for papers, etc.

Number 8

B. A. L. Gwandu and D. J. Creasey 1111 Using formal methods in a design for reliability as applied to an electronic system that integrates software and hardware to perform a function

H. Schäbe 1125 A new approach to optimal replacement times for complex systems

Kuo-Hsiung Wang 1131 Optimal operation of a Markovian queueing system with a removable and non-reliable server

T. Yuge, M. Sasaki and S. Yanagi 1137 Reliability of systems with two failure modes by using structure functions

R. G. Dear and J. S. Sherif 1143 Evaluation of protocols for availability, reliability and consistency of replicated files

S. S. Menon and K. F. Poole 1147 Early-life reliability prediction methodology for integrated circuits

Lian-Chang Zhao and Jun-Chen Xu 1157 An efficient minimizing algorithm for sum of disjoint products

Technical Note

L. R. Goel, R. Gupta and P. K. Tyagi 1163 Analysis of a two unit standby system with preparation time and correlated failures and repairs

1167 World Abstracts on Microelectronics and Reliability

1195 Book Reviews

1199 Calendar of International Conferences, Symposia, Lectures and Meetings of Interest

1203 Publications, Notices, Calls for papers, etc.
